Dear Mr. Dunlop:

On July 19, 2001, a surface compliance inspection took place at the site of your notice (copy enclosed) serialized UTU-075857, located in Lot 5, Section 5, T. 14 S., R. 19 W.

The inspection revealed about 900 square feet of surface disturbance created under this notice. A search of BLM records did not reveal that it is, or was ever, located on an active mining claim. On June 4, 2001, we received a unsigned letter from you that stated "We are also planning on opening up operations at Kearns Mountain by Pleasant Valley under our current small mining permit." This letter was on Resource Design Solution (RDS) letterhead, however, it appears that by the time we received the letter, you had resigned your position in that corporation. Therefore, we are writing to inform you that, unless RDS formally transfers the notice to its name, we consider you to be fully and singly responsible for any reclamation obligations created under the notice, and that if RDS conducts operations at the site before either submitting its own notice or formally transferring its notice to your name, we will consider them to be operating in trespass.

If you have any questions, please feel free to contact me at 435-743-3125.

Sincerely,

Jerry Mansfield
Geologist
